~BID REGULATIONS AND CONDITIONS~

BIDDERS LIST:

- A. Vendors wishing to do business with the County should be included on the "Bidders List" maintained by the County Purchasing Agent. All vendors are eligible for consideration.
- B. Vendors wishing to be added to the "Bidders List" should contact the County Purchasing Office.
- C. Removal from the "Bidders List".
  1. Removal or Suspension. The Purchasing Agent may remove any vendor on the Bidders List for such period of time deemed necessary by the Purchasing Agent.
  2. Cause for Removal or Suspension. The following shall be deemed sufficient grounds for removal or suspension:
    - a) Three consecutive failures to respond to the Notice to Bidders.
    - b) Failure to submit certificate of compliance when required.
    - c) Consistent failure to conform to bid regulations, conditions, and/or specifications.
    - d) Failure to make timely deliveries.
    - e) Failure to keep bid firm for the time specified on the Notice of Bid.
    - f) Collusion with other bidders or prospective bidders to restrain competitive bidding.
    - g) Bankruptcy or other evidence of insolvency of the bidder.
    - h) Giving false or misleading information in an application for inclusion of the "Bidders List".
    - i) Any violation of these rules and regulations or other information suggesting that the bidder is no longer responsible and qualified to do business with the County.
  3. Notice of removal or suspension from the Bidders List will be sent to affected vendor. This action may be contested in writing to the Purchasing Agent within five working days.

BIDDING PROCEDURES:

- A. Solicitation of Bids.
  1. Concerning Solicitation. The Purchasing Agent provides fair and impartial consideration to all qualified bidders and seeks to obtain the highest practicable degree of full and free competition. All interested vendors are urged to apply for inclusion on the Bidders List.
  2. Bid Selection. The County Commissioners reserves the right to reject any or all bids or award all or any portion of the items bid including awarding by districts on any items bid. The Purchasing Agent will solicit phone bids from three or more vendors selected at random, if this occurs.
- B. Bid Form:
  1. Bids are submitted on the forms containing items and/or goods a vendor wished to bid. Return of bid constitutes a valid offer good for 30 days from the date of opening.
  2. Formal Requirements.
    - a) Written in Ink or Typewritten. All bids must be written legibly in ink or preferably typewritten.
    - b) Authorized Signature. The bid must bear the signature in ink by the person so authorized.
    - c) Notary Seal. Each bid must bear the signature and seal of an authorized Notary Public on the Affidavit of Non-Collusion.
    - d) Labeled and sealed envelope. Bidders name and address and closing date must appear on the face of the envelope.

HOLD HARMLESS AGREEMENT:

All bidders shall defend, indemnify and hold the County of Canadian County, State of Oklahoma, its commissioners, officers, deputies and employees harmless from and against any and all liability, loss, expense (including reasonable attorney's fees), or claims for injury or damages arising from, relating to, or connected with the performance of the bidding work.

BID CONTENTS:

1. Entire Agreement. The Bid Regulations and Conditions of this section together with the Notice of Bid and any other sheets or documents made a part of the bid package, shall constitute the entire agreement between parties.
2. Modification. An addendum will be issued, when deemed necessary, for any changes in, additions to, or waivers of specifications, or regulations and conditions of the bid. The Purchasing Agent must issue this addendum.
3. Offer firm for thirty days. Return of bid constitutes a valid offer guaranteed for a minimum of 30 days by vendor until bid is awarded. After bid is awarded offer is firm for six months.
4. Items to be new or current. Unless otherwise stated within the bid, goods and materials offered in the bid are to be new and of current design.
5. Non-Acceptance of Split Award – "All or None Bid" – The County Commissioners reserve the right to make and award on items or groups of items listed on the bid. If the vendor wishes to bid "All or None", this must be clearly shown of the bid.
6. Shipping Instructions. Goods and materials are to be shipped F.O.B., the receiving officer or department. All freight is to be borne by the vendor and included in the bid price.
7. Title and Risk of Loss. Title of goods shall not pass from the vendor until such goods are received by requisitioning departments receiving officer. Risk of such loss prior to such receipt shall be borne by the vendor.
8. Delivery. Time is of the essence and deliveries are to be made within ten days after receipt of an order. Items to be picked up by the County shall be ready within 24 hours of notice.
9. Inspection and Rejection. All goods and materials shall be subject to inspection by the receiving officer at the time of delivery. Any goods not in complete conformance with the specifications, defective in materials or workmanship, or found to contain latent defects will be rejected. Such goods are to be removed and replaced by and at the cost of the vendor promptly after notifications of rejection. Risk or loss as to such rejected goods shall be borne by the vendor.
10. Payment. Payment by the County for goods received shall not constitute acceptance if subsequent discoveries reveal latent defects or a failure to meet bid specifications. Payment for a period delivery shall not be deemed acceptance of undelivered goods.
11. Exemption from Taxes. Purchases made by the County are exempt from State Sales Tax and from Federal Excise Tax. These taxes should not be included in bid prices. When required, the Purchasing Agent will supply the proper tax exemption certificate.

SUBMISSION PROCEDURES:

- A. **Sealed envelopes. Bids must be submitted in a sealed envelope with the name and address of the vendor and date and time of closing clearly marked on the outside of the envelope.**
- B. **Late Bids. Bids received after the time and date of closing listed on Notice to Bidders will not be opened. These late bids will remain unopened and become a permanent part of the bid file.**

AWARDING OF BIDS:

- A. Acceptance. The Purchasing Agent will compile the bids submitted. The County Commissioners will open and award all bids. The Purchasing Agent will notify all successful bidders in writing prior to onset of the bidding period. **Vendors should not submit bids for items that are not on the six month bid request. Bids will be awarded only for items on the six month bid request.**

Purchases of items and supplies that are on this Six Month Bid list must be made from the vendor listed. This is an exclusive contract between Canadian County and the vendor for the time period mentioned on the "NOTICE TO BIDDERS". The county must be as sincere in fulfilling its obligation by buying from the vendor as it expects the vendor to be in holding the price stable to the bid period.

B. Grounds for Rejection:

1. Non-Responsive Bid. Any bid which does not meet the requirements or specifications of the bid, or is unsuitable for the intended use, or does not comply with these regulations and conditions may be rejected. The County Commissioners reserve the right to reject any or all bids when such is deemed in the best interest of the County.
2. Affidavit. The Non-Collusion Affidavit not signed and notarized and/or included with the bid.

PERFORMANCE BY SUCCESSFUL BIDDER:

A. Delivery of Goods:

1. Deliveries shall be made within **ten days from the date ordered**. Items to be picked up by the County shall be ready within 24 hours of Notice.
2. Deliveries are to be made to the requisitioning department and the vendor will be advised of such time of order.

SUB-LETTING:

- A. Any bid submitted with sub-letting to firm other than the bidding vendor will or shall be CLEARLY SPECIFIED ON THE BID SHEET.

THE USE OF RECYCLED MATERIALS:

- A. If a vendor has products using recyclable materials and regular materials, the vendor shall submit separate bids, using one bid for recyclable materials only and using one bid for regular materials.

CHANGING OF BID SPECIFICATIONS:

- A. Bid forms shall be filled out as specified. If a Vendor chooses to change the bid specifications, the bid will be subject to rejection by the Board of Canadian County Commissioners.

ALUMINIZED STEEL TYPE "2" PIPE SPECIFICATIONS:

- A. This proposal for furnishing Corrugated Aluminized Steel Type "2" Pipe as per Oklahoma State Highway Specifications, Section 726, 1999 Edition and Supplements, delivered F.O.B. to specified locations in Canadian County. Steel Sheet, aluminum-coated (type 2) by the hot-dip process for sewer and drainage pipe shall conform to the AASHTO M 274.

AFFIDAVIT MUST BE INCLUDED WITH YOUR BID OR BID WILL BE REJECTED BY THE BOARD OF CANADIAN COUNTY COMMISSIONERS.

**RETURN THIS PAGE WITH THE BID**

~AFFIDAVIT OF NON-COLLUSION OF BIDS~

STATE OF \_\_\_\_\_)

COUNTY OF \_\_\_\_\_)

I, the undersigned of lawful age, being first duly sworn on oath say that he or she is the agent authorized by the bidder to submit the attached bid. Affidavit further states that the bidder has not been a party to any collusion among bidders in restraint of freedom of competition by agreement to bid at a fixed price or to refrain from bidding; or with any state official or contract, or in any discussions between bidders and any state official concerning exchange of money or other things of value for special consideration in letting of a contract, that the bidder/contractor has not paid, given or donated or agreed to pay, give or donate to any officer or employee of the State of Oklahoma or other public entity thereof, any money or other thing of value, either directly or indirectly in the procuring of the award of a contract pursuant to this bid.

**Soil Stabilization Materials:**

**Cement:**

**All Cement for soil stabilization shall meet the following:**

Standard Specifications for: Portland Cement (ASTM C150 or AASHTO M85) or

Standard Specification for: Blended Hydraulic Cement (AASHTO C595 or AASHTO M240) or

Standard Specification for: Hydraulic Cement (ASTM C 1157)

Delivery of cement shall be made in Pneumatic trailers equipped with spreader bars that spread the material uniformly on the roadway. The cost of spreading the cement shall be included in the delivered cost of the material. Must meet current ODOT specifications.

**Fly ash:**

Fly ash should conform to AASHTO M295 Class C or Class F materials. No bottom ash or Fly ash that is not approved by the Oklahoma Department of Transportation will be accepted. Delivery of the material shall be quoted in end dump trucks with an alternate price delivered in a pneumatic trailer and spread with a spreader bar. Must meet current ODOT specifications.

**Lime:**

Lime shall be quick lime in accordance with AASHTO M 216 with an available lime index of at least 90% as per ASTM C 25. Only quicklime from sources approved by the Oklahoma Department of Transportation will be allowed. Hydrated lime will not be allowed. Lime shall be delivered in bottom drop pneumatic trailers. Must meet current ODOT specifications.

**Cement Kiln Dust:**

Cement Kiln Dust being a byproduct of the manufacture of cement should conform to the following specifications: When Tested by AASHTO T 405 the lower limits of the average of chemical properties of the material should meet or exceed the following specifications for one month before shipment. Must meet current ODOT specifications.

**CKD Requirements**

Calcium Oxides = greater than 35%

Alkali Equivalents = less than 8%

Total Sulfates = less than 10%

Loss on Ignition test = less than 30%

The vendor shall provide current tests report before shipment of the material to the county. Delivery of the material shall be quoted in end dump trucks with an alternate price delivered in a pneumatic trailer and spread with a spreader bar.

All vendors shall supply the name and contact information of a customer service representative to assist with installation questions and installation specifications for the materials quoted.

The material costs delivered to the following zones shall include all costs, not limited to: loading costs, fuel surcharges, toll fees, etc.

**TERMS AND CONDITIONS:** Awarded Vendor shall deliver and pickup equipment to location ordered by Canadian County. County will carry at its own expense general liability insurance. Vendor will perform the regular manufacturers scheduled maintenance intervals (other than daily and weekly for which the County is responsible) including replacement of wear items, tires and undercarriage components during the term of the rental. Other than replacement due to damage resulting from County's negligence or from vandalism. County agrees to notify Vendor when the service meter indicates scheduled maintenance is due and to make the equipment available to complete the required maintenance. Vendor will perform the regular manufacturer's scheduled maintenance intervals including replacement of wear items, tires and Vendor will furnish to the County all fluids, filters and replaceable wear items in the event County wishes to perform the equipment maintenance after normal working hours or on weekends. Scheduled maintenance must be performed at no less than 250 service meter hours or 6 weeks use. County is responsible for the cost of all repairs due to abuse, damage, neglect, and improper operation, failure to replace wear items or perform manufacturer's

If a pay item for *Miscellaneous Pipe Work* does not exist, the Department will consider the cost of miscellaneous pipe work to be included in the contract unit price of other relevant pay items.

## SECTION 623 GUARDRAIL AND END TREATMENTS

### 623.01 DESCRIPTION

This work consists of constructing guardrail, end treatments, posts, blockouts, and other appurtenances. The Department defines the following types of guardrail:

- Beam Guardrail Steel W-Beam Single.
- Beam Guardrail Steel W-Beam Double.
- Beam Guardrail Steel Thrie Beam Single.
- Beam Guardrail Steel Thrie Beam Double.
- Beam Guardrail Steel Transition Section.
- Guardrail Anchor Unit, or
- Guardrail End Treatments (GET).

Use GETs that are designed as W-Beam guardrail terminals. Provide GETs with anchors capable of supporting the rail tensile strength developed during a downstream impact and remaining crashworthy for end-on impacts. Ensure the GETs satisfy the National Cooperative Highway Research Program (NCHRP) Report 350 for a test level 3 (TL-3) terminal and are approved for use on the National Highway System.

### 623.02 MATERIALS

Provide materials in accordance with the following sections and subsections:

<b>Material:</b>	<b>Section or Subsection:</b>
Portland Cement Concrete Class A	701
Epoxy Resin Adhesive	701.13
Reinforcing Steel	723
Requirements for Paint Systems	730.02
Guardrail Posts	732.01
Spacer Blocks (Blockouts)	732.01
Beam Guardrail Elements	732.01
Fittings (Steel Hardware)	732.01
Reflective Sheeting for Guide Posts	733.05
Non-Shrink Grout	733.07

Ensure the GETs are manufactured with new material and assembled in accordance with the manufacturer's standards. Provide a GET capable of flattening and bending the guardrail away from the impacting vehicle.

Ensure the guardrail elements are continuous 12-gauge sections: either one 26 ft [8.0 m] long section, or two 13 ft [4.0 m] long sections.

**623.03 EQUIPMENT — VACANT****623.04 CONSTRUCTION METHODS****A. Setting Posts for Guardrail or Barrier Posts**

Set posts for guardrail as shown on the Plans. Dig post holes in compacted soil. Keep the bottoms of the holes free of loose material to ensure a stable post foundation.

Space the posts as shown on the Plans and set plumb with the front faces in a straight line. For curves, set posts a uniform distance from the edge of the pavement.

Set the tops of the posts to the elevations shown on the Plans or as approved by the Resident Engineer.

After placing the posts, backfill the holes with material approved by the Resident Engineer. Compact each layer of material to a depth no greater than 6 in [150 mm]. Ensure compaction operations do not change the alignment of the post.

Posts for guardrail may be machine driven. Fill surface depressions resulting from driving the posts. Use material similar to the in-situ material and compact.

**B. Rail Elements**

Erect rail elements in a smooth, continuous installation. Tighten all bolts except adjustment bolts. Provide bolts with lengths that extend beyond the nuts.

If field painting rail elements, first apply a rust-inhibitive primer to correct damage to the shop coat of paint. Field paint surfaces before erecting rail elements inaccessible to painting after erection. Uniformly apply the number of coats of paint required in the Contract by brush or pressure spray.

Protect the following with two coats of zinc rich paint:

- Abraded galvanized surfaces with exposed base metal,
- The threads of fittings, and
- Fasteners and cut ends of bolts.

Install double-faced guardrail as shown on the Plans.

Do not modify anchor-bolt holes or slots to accommodate connections in the field. Obtain Resident Engineer approval for modifications to standard guardrail design. Ensure modifications pass Department inspection before installing.

**C. Placing Metal Plate Rails and Fittings**

Fasten metal plate rails to the posts as shown on the Plans. Overlap the rail sections at least 6 in [150 mm] in the direction of traffic so the end of the previous plate rail covers the start of the succeeding plate rail.

Use only one type of metal plate guardrail on the Project, unless otherwise shown on the Plans.

**D. Guardrail Anchor Units**

Construct guardrail anchor units as shown on the Plans. If encountering rock harder than medium sandstone (surface outcropping, massive boulders, and ledge rock under overburden) during construction of the concrete anchor, proceed as follows:

**(1) For Surface Outcroppings**

Drill four spaced and patterned holes with 2 in [50 mm] diameters. Fill half of each rock hole with pourable epoxy grout, insert full depth anchor bolts, and stabilize them. Fill the remainder of the hole with epoxy. Expel air bubbles and voids from the holes.

**(2) For Rock With Soil Overburden 18 in [450 mm] Deep or Less**

Use the following steps:

- Drill four spaced holes for the anchor bolts.
- Drill four additional holes with a diameter of 2½ in [64 mm], each 12 in [300 mm] from the center of the concrete anchor and spaced 90° apart.
- Fill half of each outer hole with pourable epoxy grout.
- Insert, plumb, and stabilize one number 9 reinforcing steel bar per hole, cut to the length needed for the anchor unit.
- Cut the reinforcing steel bar to a length that allows insertion of at least 12 in [300 mm] into the rock and a clearance of 2 in [50 mm] above the top of the concrete anchor.
- Fill the remainder of the hole with epoxy and expel the bubbles.
- Tie the 6 × 6-W1.5 × W1.5 wire mesh to the bars after the grout dries.
- Spread pourable epoxy grout on the surface between the rock and concrete for positive bond.
- Construct the upper portion of the anchor unit as shown on the Plans.

**(3) For Rock Encountered Deeper Than 18 in [450 mm]**

Construct the anchor in accordance with the procedure for soil with overburden 18 in [450 mm] deep or less, and omit the four additional anchors.

**E. Guardrail End Treatments (GET)**

Ensure experienced workers fabricate and install the GET as shown on the Plans and ensure the end treatment remains intact, redirects side vehicular impacts, and flattens the rail element to attenuate head-on vehicular impacts.

Construct GETs with certified, crash-tested hardware. Ensure NCHRP 350 TL-3 certification for substituted hardware. Obtain the Resident Engineer's approval of substitution GET component hardware and ensure it passes Department inspection before installation.

**F. Blockouts**

For safety end treatments, use certified blockouts meeting the minimum requirements of NCHRP 350 TL-3. Provide a letter of certification with substitutions. Obtain the Resident Engineer's approval of substitutions before installation.

Provide certification of blockouts used in safety end treatments. Ensure that composite or synthetic blockouts used in safety end treatments attached to bridges or permanent concrete walls have been crash-tested and certified.

**G. Guardrail Bridge Connection (GBC)**

Ensure experienced workers fabricate and install the GBC as shown on the Plans and ensure the bridge connection remains intact, redirects side vehicular impacts, and

flattens the rail element to attenuate vehicular impacts at the approach ends of the bridge rail.

Construct GBCs with approved NCHRP 350 TL-3 designs, using only certified and crash-tested hardware. Provide NCHRP 350 TL-3 certifications for substitute hardware, except for posts and blockouts, which may not be substituted without an actual crash test certification. Obtain the Resident Engineer's approval of substitution GBC component hardware and ensure it passes Department inspection before installation.

### 623.05 METHOD OF MEASUREMENT

The Resident Engineer will measure the length of guardrail from center to center of the supporting posts.

The Resident Engineer will measure *Blockouts* using the length of the guardrail from the first blockout to the beginning of the next anchor unit.

### 623.06 BASIS OF PAYMENT

The Department will pay for each pay item at the contract unit price per the specified pay unit as follows:

<b>Pay Item:</b>	<b>Pay Unit:</b>
(A) BEAM GUARDRAIL W-BEAM SINGLE	Linear Foot [Meter]
(B) BEAM GUARDRAIL W-BEAM DOUBLE	Linear Foot [Meter]
(C) BEAM GUARDRAIL THRIE-BEAM SINGLE	Linear Foot [Meter]
(D) BEAM GUARDRAIL THRIE-BEAM DOUBLE	Linear Foot [Meter]
(E) BEAM GUARDRAIL TRANSITION SECTION	Each
(F) GUARDRAIL ANCHOR	Each
(G) GUARDRAIL END TREATMENT	Each
(H) BLOCKOUTS	Linear Foot [Meter]
(I) GUARDRAIL BRIDGE CONNECTION	Each
